

Product

Chromatography vial

Category: Consumable Material / Laboratory Glass / Chromatography

Description

Chromatography Autosampler Vials are containers used to securely hold your samples before analysis. The design and functionality of vials ensure seamless integration with various autosamplers.

High-quality glass vials provide excellent chemical resistance and optimal sealing, paired with precision-crafted septa and closures. This reduces evaporation and contamination, leading to cleaner baselines and more accurate sample injections, ultimately improving analytical results.

Material

Borosilicate glass

Specification

- - Type I Borosilicate Glass Construction
- - Graduated Marking Spot for Precise Tracking
- - Universal Autosampler Compatibility

Product Variants

Catalog number	Reference	Volume	Height	Diameter	Gradacija	Opseg gradacije	Kom/pak	Color	Note
28425CL	vial 2ml clear	2ml	32mm	12mm	da	0-2ml	a100	clear	screw thread 8-425
